DETAILED ACTION

Request Continued Examination

1. The request filed on 2/11/2004 for a Request Continuation Examination (RCE) under 37 CFR 1.53(d) based on parent Application No. 09/935987 is acceptable and a RCE has been established. An action on the RCE follows.)

Allowable Subject Matter

2. Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claims 1-3 and 8, the prior art alone or in combination does not teach the limitation of an anode comprising a conducting niobium suboxide layer, wherein the conductive niobium suboxide layer is situated between a niobium pentoxide layer and a niobium metal core.

With respect to claims 4-7, the prior art alone or in combination does not teach the limitation of a process for producing an anode, the anode comprising a conducting niobium suboxide layer, wherein the conductive niobium suboxide layer is situated between a niobium pentoxide layer and a niobium metal core.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

3. The applicant has argued that Fife and Loffelholz are silent with respect to an anode comprising a conducting niobium suboxide layer, wherein the conductive niobium suboxide layer is situated between a niobium pentoxide layer and a niobium metal core. The examiner finds this argument persuasive. Therefore, the examiner made decision to allow this limitation over the prior art of record.

Citation Relevant of Prior Art

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. Kimmel et al disclose method to partially reduce a niobium metal oxide and oxygen reduced niobium oxides.

b. Naito et al disclose niobium powder for capacitor sintered body thereof and capacitor using the sintered body.

c. Koshiba discloses lithium secondary battery.
